7075 aluminum sheet (Al-Zn-Mg-Cu) belongs to super-hard aluminum. As a kind of cold finished wrought alloy, it has great strength and hardness. It’s far better than mild steel. This alloy has good mechanical properties and anode reaction. 7075 aluminum sheet as a typical kind of aerospace aluminum alloy material is usually used for high-end fields.

Features and Applications

7075 super-hard alloy is the most representative one of 7000 series, is usually used as welding or aircraft materials. 7075 aluminum sheet is used for manufacturing of
high-strength aircraft structures and other high-stress structural parts with great strength and strong corrosion resistance, such as lower wing panel, stringers, frame of the aircraft.

**Strength of Mingtai Al**

1. A listed company with high reputation.
2. About 20 years’ developmental history, skilled workers.
3. Enough raw material supplying, fast delivery guaranteed.
4. DC product, and can live up to EN, JIS, ASTM standards.
5. Obtain many strict quality certifications, SGS, DNV GL, CCS etc.
6. Reasonable price, good quality.
Packaging and Delivery of Mingtai Al

Aluminum products of Mingtai Al. meet the export standards. Plastic film and brown paper can be covered at customers’ need. What’s more, wooden case or wooden pallet is adopted to protect products from damage during the delivery, especially from seawater. There are two kinds of packaging, which are eye to wall and eye to sky. Customers can choose either of them for their convenience. For more details, please contact us.

Generally speaking, there are 2 tons in one package, and loading 18-22 tons in 1×20’ container, and 20-24 tons in 1×40’ container.
